CK CUT
PRECISION CUTS Limitless Possibilities

## 1: Complete CNC Production Solutions

**We deliver precision machining from raw material to finished components. Whether you need a single prototype or a small to medium production batch – we handle the full process.**

- 5-axis CNC milling and turning
- Tight tolerances and quality control (CMM)
- Material sourcing or machining from customer-supplied stock
- CAM programming and fixture design
- Subcontracted surface treatments (hardening, anodizing, etc.)
- Documentation and traceability upon request

**With our flexible setup and modern machinery, CK Cut is your reliable partner for fast delivery, transparent pricing, and industrial-grade quality.**

FROM DRAWING TO DELIVERY – WITH ZERO HASSLE

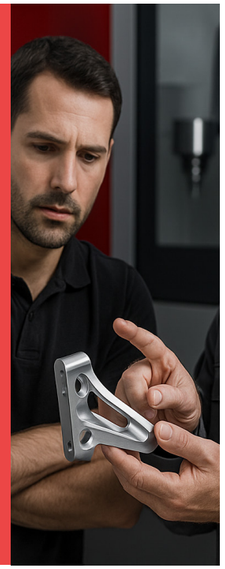

## 2: Flow and Cycle Time Optimization

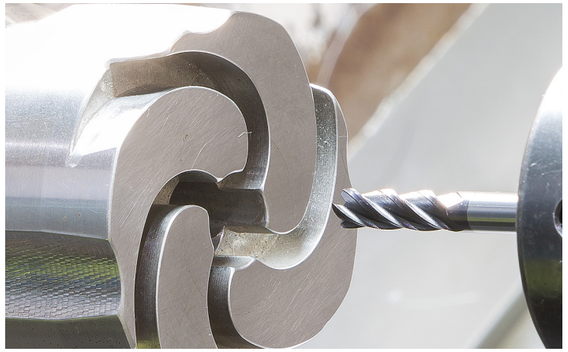

**We optimize your production flow using real-world machining insights.**

By analyzing your parts and current setup, we help increase output without the need for new machines or extra manpower.

We collaborate closely with your team and our network of trusted tool suppliers to deliver measurable improvements:

- Re-design of parts for better machinability
- Improved fixture and clamping solutions
- Tool selection and cutting data optimization
- CAM programming to reduce tool changes and cycle time
- Real-world testing and validation on your equipment
- On-site or remote implementation support

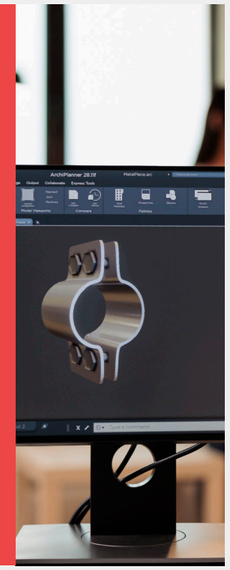

## 3: Prototype to Series Manufacturing

**We support your full development cycle – from idea to market-ready product**

Whether you're developing a new part or refining an existing design, we provide both technical insight and practical execution.

**Our capabilities include:**

- Prototyping in aluminium, steel, plastics, titanium or Carbon fiber
- Design-for-manufacturing feedback and revision
- Tolerance-critical machining and assembly-ready finishes
- In-house and subcontracted component assembly
- Batch production for pilot runs or pre-series
- Full documentation and implementation support for scaling

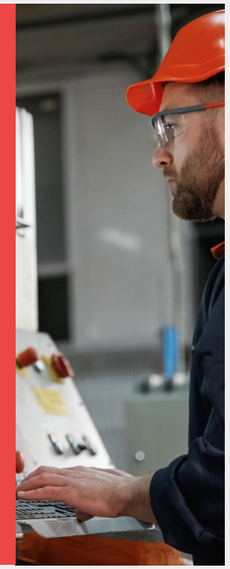

## 4: One Partner – Total Solutions

**One point of contact. One production partner.**

We bring together all stages of the process – from raw material to final assembly – through a strong network of trusted subcontractors and in-house capabilities.

**With CK Cut as your partner, you get:**

- Flexible CNC machining (prototypes, series, spare parts)
- Component sourcing, fixturing and surface treatments
- In-house assembly and functional testing
- Packaging, labelling, and logistics coordination
- Single-point responsibility – from quote to delivery
- Integrated communication throughout your project

## 5: ESG – Responsibility in Action

**We take responsibility**
– for people, processes, and the planet. At CK Cut, sustainability and social impact are not buzzwords – they're embedded in how we operate.

**We actively pursue:**
Green production · Smart sourcing · Safe and inclusive workplace · Safety first · Circular mindset
